VOL. XLII, No. 7 | 31 July 2025

The Official Industrial Property Journal of ARIPO

Published  
Monthly  
by the  
ARIPO  
Secretariat

## PERMANENT NOTICES

### Lusaka Agreement

The African Regional Intellectual Property Organization (ARIPO) was established by the Lusaka Agreement which was adopted on 9 December, 1976. Objectives of the Organization are, *inter alia*, to promote, harmonize and develop the intellectual property system of the region.

Membership of the Organization is open to states members of the United Nations Economic Commission for Africa or of the African Union. States become members by depositing an instrument of accession to either the Lusaka Agreement or any of the ARIPO Protocols already in force. Currently, Member States of ARIPO are those shown in the table on the right.

### Harare Protocol

The Harare Protocol on Patents and Industrial Designs was adopted on 10 December, 1982. The protocol empowers ARIPO to grant patents and register industrial designs and utility models on behalf of the Harare Protocol contracting states. All ARIPO Member States are signatory to this protocol except Somalia and Mauritius.

### Banjul Protocol

The Banjul Protocol on Marks was adopted on 19 November, 1993. The protocol empowers the Organization to register marks centrally for those ARIPO Member States which are its signatories (see table on this page).

### Swakopmund Protocol

The Swakopmund Protocol on the Protection of Traditional Knowledge and Expressions of Folklore was adopted on 9 August 2010 and entered into force on 11 May 2015. The Protocol introduces a regional framework to protect the traditional knowledge and expressions of folklore of Africa and to ensure that it is properly utilized for the welfare of her people.

### Arusha Protocol

The Arusha Protocol for the Protection of New Varieties of Plants was adopted in Arusha, the United Republic of Tanzania on 6 July 2015.

The protocol entered into force on 24 November 2024. It empowers ARIPO to grant breeders' rights on behalf of the contracting states. This strengthens the agricultural sector by providing farmers with access to improved plant varieties that offer better yields, enhanced disease resistance, and greater adaptability to climate change.

### Patent Cooperation Treaty

The Patent Cooperation Treaty (PCT) is administered by the World Intellectual Property Organization (WIPO). Since the Harare Protocol was linked to the PCT, the PCT has become important to the development of the patent system of all ARIPO Member States.

## EDITORIAL

### Frequency of the Journal

The ARIPO Journal: the Official Industrial Property Journal of ARIPO is published every month.

### Editorial Office and Mission

The Journal is published by the ARIPO Office as part of the industrial property process under the Harare Protocol and the Banjul Protocol. (For address of the ARIPO Office, please see the section on 'Purchases and Subscriptions' and 'General Contact Addresses' below.)

### Advertisements

Any person, natural or body corporate, may advertise in the Journal on a matter of, or relating to, intellectual property (such as vacancies, new appointments, meetings, etc.). The cost of advertisement is:

- a) US \$20.00 per half column, or part thereof, measuring size 8.5 cm (across) X 12 cm (depth);
- b) US \$35.00 per full column, or part thereof, measuring size 8.5 cm (across) X 24 cm (depth);
- c) US \$40.00 per half page and US \$70.00 per full page.

Concessionary rates are available at 20% reduced rate for any number of multiple insertions.

### Purchases and Subscriptions

The ARIPO Journal is available on the ARIPO e-service platform (<http://eservice.aripo.org/ppb/pjd/PPBJournalViewList.do>) for free downloading.

However, should any reader prefer the print format over the electronic version, purchases can be made at US\$ 100.00 per paper copy. Annual subscriptions (inclusive of postage) are at US \$1 200.00. All purchases and subscriptions can be made at the following address:

**Physical:**

ARIPO Office, No. 11 Natal Road, Belgravia, Harare, Zimbabwe.

**Postal:**

Director General, ARIPO, P.O. Box 4228, Harare, Zimbabwe.

### General Contact Addresses

Communication with, or information about, the Organization for any matter generally may be made or obtained at the following addresses in addition to the ones indicated above:

**Telephone:**

+263 (242) 794065/6/8, 794074.

**VOIP:**

+263 8677005131/32.

**E-mail:**

<mail@aripo.org>.

**Website:**

<www.aripo.org>.

# GENERAL NOTICES

## Data Flow Symbols

Symbols in the following table are ARIPO-originated and are used in this publication for directing the flow of announcement columns, namely that a record (which is the largest unit in an announcement column) is ended and that an announcement column continues on the next page or it is ended.

Symbol	Interpretation	Symbol	Interpretation
● ●	End of a record in an announcement column	▶	An announcement column continues on the next page
■	End of an announcement column		

## Data Identification Codes

The data identification codes appearing in the next four tables are WIPO Standards. The first three of these tables contain codes universally known as Internationally recognized Numbers for the Identification of Data (INID) Codes. These Standards are, namely, WIPO Standard ST. 60 (Recommendation concerning bibliographic data relating to marks), Standard ST. 9 (Recommendation concerning bibliographic data on and relating to patents and supplementary protection certificates (SPCs)), Standard ST. 80 (Recommendation concerning bibliographic data relating to industrial designs) and Standard ST. 3 (Recommended standard on two-letter codes for the representation of states, other entities and intergovernmental organizations).

### INID Codes For Marks

Code	Interpretation	Code	Interpretation	Code	Interpretation
(111)	Registration number	(511)	Symbol of the Nice Class	(740)	Representative's name
(151)	Date of registration	(540)	Description of the mark	(814)	Designated states
(210)	Application number	(580)	Date of recorded change	(869)	Accepted with reserve
(220)	Filing date	(731)	Applicant's name		

### INID Codes For Patents

Code	Interpretation	Code	Interpretation	Code	Interpretation
(11)	Patent number	(54)	Title of the invention	(73)	Name(s) of holder(s) of patent or patentee's name. If in announcements concerning " <i>Patent Applications Assigned</i> " or " <i>Patents Assigned</i> ", this code represents the name of the assignor (or the name of the current owner of the patent application or the name of the current owner of the patent)
(21)	Application number	(56)	List of prior art documents cited in the examination	(74)	Attorney's name
(22)	Filing date	(57)	Abstract	(75)	Name(s) of inventor(s) who is/are also applicant(s)
(23)	Date when action is to be taken, if in announcements for " <i>Patent Applications Pending Grant</i> "; date from which status takes effect, if in " <i>Applications Abandoned</i> " or in " <i>Patents Abandoned</i> "	(71)	Applicant's name. If in announcements concerning " <i>Patent Applications Assigned</i> " or " <i>Patents Assigned</i> ", this code represents the name of the assignee (or the name of the new owner of the patent application or the name of the new owner of the patent)	(84)	States designated under the Harare Protocol
(24)	Effective date of patent	(72)	Name(s) of inventor(s)	(86)	Patent Cooperation Treaty (PCT) international filing date and number
(31)	Priority number			(96)	Harare Protocol filing date and number
(32)	Priority date				
(33)	Convention country / Convention organization				
(45)	Date of publication				
(51)	Symbol of the International Patent Classification (IPC)				

## Data Identification Codes (Contd.)

### INID Codes For Industrial Designs

Code	Interpretation	Code	Interpretation	Code	Interpretation
(11)	Design registration number	(40)	Publication date	(74)	Attorney's name
(21)	Design application number	(51)	Symbol of the Locarno Classification	(75)	Name(s) of creator(s) who is/are also applicant(s)
(22)	Filing date	(54)	Title of the design	(84)	States designated under the Harare Protocol
(24)	Effective date of registration of design	(55)	Symbol of the design		
(31)	Priority number	(71)	Applicant's name		
(32)	Priority date	(72)	Name of creator of the design		
(33)	Convention country / Convention organization	(73)	Name of holder of the design registration		

### Country/Organization Codes Used in this Issue of the Journal

Code	Country / Organization	Code	Country / Organization	Code	Country / Organization

## Erratum: Patent Applications Filed

The patent application below, which was published in the May 2025 issue of the ARIPO Journal has been amended by the applicant to remove Namibia from the designated states. The applicant advised that the inclusion of Namibia was done in error. We republish the application below with the correct designations.

**(54) Title**  
APPARATUS AND METHOD FOR INSECT BREEDING

**(57) Abstract**

The invention relates to an apparatus (100) and method for breeding insects, preferably larvae, and/or hatching insect eggs. The apparatus comprising: a housing (110) adapted to comprise a mass of insects and/or insect eggs and nourishment, at least one beam (120) being moveably mounted on the upper part and/or substantially in the centre of the housing, at least one substantially vertically oriented auger (130) suspended from the beam, the auger being rotatable and adapted to stir the mass of insects and nourishment in the housing, a perforated floor (140), and an air supply (150) providing an airflow through the perforated floor into the housing.

 A METHOD OF MEASURING SOIL

**(57) Abstract**

A method of measuring soil, the method including the steps of assessing the characteristics of a landscape under inspection to identify one or more feature groups of the landscape under inspection and the amount of area of land of each of the feature groups; identifying sampling locations in each of the feature groups; undertaking soil sampling at each identified sampling locations to calculate the content of the feature of the soil in each of the feature groups; and calculating the content of the feature of the landscape under inspection using the calculated content of a feature of the soil of each of the feature groups and the amount of area of land of each feature group as a proportion of the total area of the landscape under inspection.

ORALLY IMPLANTABLE DRUG DELIVERY DEVICE

**(57) Abstract**

Disclosed herein are buccal implant devices comprising a body having a non-cylindrical geometry, the body adapted to be disposed within the oral cavity of a patient (e.g., the oral mucosa of a patient), and one or more pharmaceutically active ingredients. Also disclosed are methods of using the buccal implant devices in treating or preventing medical conditions.

**(54) Title**  
METHOD FOR MANUFACTURING SURFACE ENHANCED RAMAN SPECTROSCOPY TAGS

**(57) Abstract**

The present invention relates to the field of methods of manufacturing of surface enhanced Raman spectroscopy (SERS) tags. The manufacturing method according to the present invention is reproducible and versatile and enables the production in an expedient manner of high quantities of SERS tags characterized by a narrow size distribution and a high ratio of low-number aggregates. SERS tags manufactured by the inventive manufacturing method described herein provide increased ensemble SERS responses.

CONFIGURING A WIRELESS DEVICE CONFIGURED WITH MULTI-RADIO ACCESS TECHNOLOGY DUAL CONNECTIVITY

**(57) Abstract**  
Methods and apparatus are disclosed, including in an example a method performed by a wireless device configured with Multi-Radio Access Technology Dual Connectivity (MR-DC). The method comprises receiving, from a first network node, at least one message in a reconfiguration procedure for a first cell group. The at least one message indicates a mode of operation of the wireless device for a second cell group by the wireless device.

RADIATION INSPECTION SYSTEM

**(57) Abstract**

The present disclosure provides a radiation inspection system, including a container (1) respectively provided with an entrance (A) and an exit (B) on opposite side walls thereof; and a radiation scanning imaging device (2) disposed in the container (1) and having an inspection channel (G). The radiation scanning imaging device (2) includes a ray source (21), the ray source (21) includes a plurality of ray generators (21'), and the plurality of ray generators (21') are configured to emit ray beams at different angles, so that the radiation scanning imaging device (2) performs radiation scanning inspection on an object to be inspected passing through the inspection channel (G) from the entrance (A) to the exit (B).

**(54) Title**  
BREATHER STRUCTURE OF ELECTRIC VEHICLE

**(57) Abstract**

By attaching a power unit (P) to a swing arm (51) at a 1st attachment portion (31a), a gas-liquid separation chamber (100) having an atmosphere opening hole (105) is formed between the 1st attachment portion (31a) and the swing arm (51). Since the gas-liquid separation chamber (100) is communicated with a breather chamber (80) through a hose (120), and the breather chamber (80) is communicated with a gear chamber (43), the pressure of the gear chamber (43) can be released to the atmosphere after being guided to the gas-liquid separation chamber (100). Thus, even if rainwater or the like enters the gas-liquid separation chamber (100) from the atmosphere opening hole (105), the gas-liquid separation chamber (100) functions as a water storage tank, so that the rainwater or the like can be suppressed from flowing back to the gear chamber (43), and waterproofness of the breather structure can be enhanced.

DRAINAGE SYSTEM, DRAINAGE UNITS, AND METHOD

**(57) Abstract**

A drainage system (1) comprising: at least one water receiving unit (20) having: a water receptacle (22) for receiving water from an adjoining surface; a first neck piece (24) which can be connected to the water receptacle (22) and provided such that water can flow out of the water receiving unit (20) through an opening (26) of the first neck piece (24); and at least one water drainage unit (40) for draining the water, comprising: a pipe body (42); and a first opening (46b), provided on the pipe body (42), for receiving the water in said pipe body (42); wherein: the water drainage unit (40) can be provided and oriented under the surface such that the opening (26) of the first neck piece (24) and the first opening (46b) of the pipe body (42) can be connected and the water flowing out of the water receiving unit (20) can flow into the water drainage unit (40). Also disclosed are drainage units and methods.

**(54) Title**  
AN ANTI-THEFT SYSTEM FOR VEHICLE

**(57) Abstract**

The present invention provides an anti-theft system for vehicle comprising; an ignition switch (200); an electronic circuit (250) configured to generate at least one signal upon receiving power from a battery (220) through ignition switch (200); a control unit (270) configured to receive the signal generated by said electronic circuit (250) and said control unit (270) is in connection with at least one vehicle component; wherein, the ignition switch (200) comprises a mechanism configured to connect at least a single input with multiple outputs to enable power supply from power source (220) to the electronic circuit (250) and to the control unit (270) from battery wherein; the control unit (270) is configured to allow starting of vehicle by enabling functioning of at least one of the vehicle component after authenticating the signal received from the electronic circuit (250).

**(54) Title**  
A SYSTEM AND METHOD FOR DELIVERING DOMAIN OR USE-CASE SWITCH SUGGESTION FOR AN ONGOING CONVERSATION

**(57) Abstract**

A system and method are described for dialogue management by determining a transition from a domain or a use case to another and initiating a switch suggestion in a human-computer conversation for rendering services to a user based on the updated domain or use case for a dialogue. The method comprises determining a first use-case in the human-computer conversation and assigning a first use-case score to the said first use-case. The method then comprises determining a second use-case in the human-computer conversation and assigning a second use-case score to the said second use-case. Further, the method comprises determining whether to make the use-case switch suggestion to the said second use-case based on the said first use-case score and the said second use-case score. The invention aligns the system to extract intended information from/for the user thereby making the system more efficient, approachable and user-friendly by saving time and cost.

**(54) Title**  
CERTIFIED TEXT DOCUMENT

**(57) Abstract**

The invention protects a content of a digital or physical document against forgery. It allows automatic detection of any modification in an arrangement of graphical symbols (e.g. a text) provided on a support (e.g. printed or displayed) with respect to an original arrangement by providing on the support reproducible verifiable data including a verification barcode, while eliminating redundancy between data inside the barcode and the graphical symbols, and resolving the problem of the size of the barcode when the size of the data for these graphical symbols is large.

**(54) Title**  
PROCEDURE FOR THE FILLING OF SOLIDS IN PHARMACEUTICAL CONTAINERS AND THE SEALING THEREOF UNDER STERILE CONDITIONS

**(57) Abstract**

A sterile procedure for the filling of solids in pharmaceutical containers and the sealing thereof under sterile conditions; among these being syringes, vials, capsules, ampoules, single-dose devices or cartridges filled with solid substances selected from the group formed by powder granules, pellets, nanoparticles or microparticles, obtaining the airtightness of said containers. More specifically, the procedure achieves the avoidance of the adherence of the aforementioned substances to the sides of the pharmaceutical containers, thus ensuring the airtightness of the seal of the container and likewise the exactitude of the weight of solid dispensed into the container.

METHODS AND SYSTEMS FOR REDUCING ARTEFACTS IN IMAGE RECONSTRUCTION

**(57) Abstract**

The invention relates to methods and systems for reducing artefacts in image reconstruction employed in tomographic imaging including Positron Emission Tomography (PET) and Computer Assisted Tomography (CAT) or (CT). The method is carried out entirely or in part by a computer or computerised system communicatively coupled to a detector arrangement which comprises a plurality of detector elements, wherein the detector elements are configured to detect photons associated with an object during PET and CAT screening processes in at least medical and mining applications.

(54) Title  
CAP FOR CONTAINER

(57) Abstract

A cap for a container is formed so that the cap has a top plate and a circular sidewall. Two opposite sides of the circular sidewall circularly connect to each other, one periphery of the circular sidewall connecting to one surface of the top plate forming a closed end, and another periphery of the circular sidewall at an opposite side of the closed end forms an opened end. Incisions are in the circular sidewall. The incisions form a ring member located at the opened end of the cap separated from a main body of the cap by a first incision and a second incision between the opened end of the main body and the ring member.

APPARATUS AND METHOD FOR OBTAINING FRESH WATER

**(57) Abstract**

Apparatus (10) for obtaining fresh water by artificially generating a precipitation. The apparatus (10) comprises at least one darkening body (14) that forms a darkening surface (12) which has a width and/or length of at least 3 km and an albedo of less than 0.1. The apparatus further comprises at least one base frame (22) which is configured to support the at least one darkening body (14) and to keep at least one darkening body (14) spaced apart from a support surface (16) in order to form a space (24) between the support surface (16) and the at least one darkening body (14). Still further, the apparatus (10) comprises a precipitation collection system (26) which is arranged at least partially within the space (24) and configured to collect the precipitation falling on the darkening surface (12).

<p><b>(54) Title</b>                      GEOTHERMAL POWER FROM SUPERHOT GEOTHERMAL FLUID AND MAGMA RESERVOIRS</p>																				
<p><b>(57) Abstract</b></p> <p>System, method, and apparatus for harnessing geothermal power from superhot geothermal fluid (SHGF) and magma reservoirs. An exemplary apparatus can include a well screen coupled to an end of a casing string. The well screen, which is at least partially submerged within an underground reservoir, defines a volume in the underground reservoir that can be filled with superhot geothermal fluid. A slidable casing is aligned coaxially with the well screen and configured to be repositioned relative to the well screen. A draw pipe extending through the slidable casing is configured to convey SHGF from the underground reservoir towards the surface in response to the slidable casing being repositioned to obstruct more of a set of apertures in the well screen and an increase in pressure within a cavity of the slidable casing.</p>

SYSTEM AND METHOD FOR AD GENERATION ON A PEER TO PEER NETWORK

**(57) Abstract**

The present invention relates to an advertising generation in peer to peer networks, comprising a server with a storage device and memory, a first network, and at least a first and second devices capable of engaging in a peer to peer network, preferably via Bluetooth or Wi-Fi. Said server being able to maintain a list of ad content in its storage device or memory, and is capable of transmitting via a first network said list of ad content to at least a device capable of initiating and maintaining a peer to peer network. The first device receives said list of ad content, generates a list of share-able material from material available on memory or storage and received list, and transmits in ad format said material in said share-able list to second device if said material is unavailable on second device.
