

ARIPO JOURNAL

VOL. XLIII, No. 7 | 31 July 2026

The Official Industrial Property Journal of ARIPO

Published
Monthly
by the
ARIPO
Secretariat

PERMANENT NOTICES

Lusaka Agreement

The African Regional Intellectual Property Organization (ARIPO) was established by the Lusaka Agreement which was adopted on 9 December, 1976. The objectives of the Organization are, *inter alia*, to promote, harmonize and develop the intellectual property system of the region.

Membership of the Organization is open to states members of the United Nations Economic Commission for Africa or of the African Union. States become members by depositing an instrument of accession to either the Lusaka Agreement or any of the ARIPO Protocols already in force. Currently, Member States of ARIPO are those shown in the table on the right.

Harare Protocol

The Harare Protocol on Patents, Utility Models and Industrial Designs was adopted on 10 December, 1982. The protocol empowers ARIPO to grant patents and register industrial designs and utility models on behalf of the Harare Protocol contracting states. All ARIPO Member States are signatory to this protocol except Somalia.

Banjul Protocol

The Banjul Protocol on Marks was adopted on 19 November, 1993. The protocol empowers the Organization to register marks centrally for those ARIPO Member States which are its signatories (see table on this page).

Swakopmund Protocol

The Swakopmund Protocol on the Protection of Traditional Knowledge and Expressions of Folklore was adopted on 9 August 2010 and entered into force on 11 May 2015. The Protocol introduces a regional framework to protect the traditional knowledge and expressions of folklore of Africa and to ensure that it is properly utilized for the welfare of her people.

Arusha Protocol

The Arusha Protocol for the Protection of New Varieties of Plants was adopted in Arusha, the United Republic of Tanzania on 6 July 2015 and entered into force on 24 November 2024. It empowers ARIPO to grant breeders' rights on behalf of the contracting states. This strengthens the agricultural sector by providing farmers with access to improved plant varieties that offer better yields, enhanced disease resistance, and greater adaptability to climate change.

Patent Cooperation Treaty

The Patent Cooperation Treaty (PCT) is administered by the World Intellectual Property Organization (WIPO). Since the Harare Protocol was linked to the PCT, the PCT has become important to the development of the patent system of all ARIPO Member States.

Accessions / Ratifications

Member State	Lusaka Agreement	Harare Protocol	Banjul Protocol	Swakopmund Protocol	Arusha Protocol
Botswana	06.02.1985	06.05.1985	29.10.2003	28.03.2012

EDITORIAL

Frequency of the Journal

The ARIPO Journal: the Official Industrial Property Journal of ARIPO is published every month.

Editorial Office and Mission

The Journal is published by the ARIPO Office as part of the industrial property process under the Harare Protocol and the Banjul Protocol. (For address of the ARIPO Office, please see the section on 'Purchases and Subscriptions' and 'General Contact Addresses' below.)

Advertisements

Any person, natural or body corporate, may advertise in the Journal on a matter of, or relating to, intellectual property (such as vacancies, new appointments, meetings, etc.). The cost of advertisement is:

- a) US \$20.00 per half column, or part thereof, measuring size 8.5 cm (across) X 12 cm (depth);
- b) US \$35.00 per full column, or part thereof, measuring size 8.5 cm (across) X 24 cm (depth);
- c) US \$40.00 per half page and US \$70.00 per full page.

Concessionary rates are available at 20% reduced rate for any number of multiple insertions.

Purchases and Subscriptions

The ARIPO Journal is available on the ARIPO e-service platform (<http://eservice.aripo.org/ppb/pjd/PPBJournalViewList.do>) for free downloading.

However, should any reader prefer the print format over the electronic version, purchases can be made at US\$ 100.00 per paper copy. Annual subscriptions (inclusive of postage) are at US \$1 200.00. All purchases and subscriptions can be made at the following address:

Physical:

ARIPO Office, No. 11 Natal Road, Belgravia, Harare, Zimbabwe.

Postal:

Director General, ARIPO, P.O. Box 4228, Harare, Zimbabwe.

General Contact Addresses

Communication with, or information about, the Organization for any matter generally may be made or obtained at the following addresses in addition to the ones indicated above:

Telephone:

+263 (242) 794065/6/8, 794074.

VOIP:

+263 8677005131/32.

E-mail:

<mail@aripo.org>.

Website:

<www.aripo.org>.

GENERAL NOTICES

Data Flow Symbols

Symbols in the following table are ARIPO-originated and are used in this publication for directing the flow of announcement columns, namely that a record (which is the largest unit in an announcement column) is ended and that an announcement column continues on the next page or it is ended.

Symbol	Interpretation	Symbol	Interpretation
● ●	End of a record in an announcement column	▶	An announcement column continues on the next page
■	End of an announcement column		

Data Identification Codes

The data identification codes appearing in the next four tables are WIPO Standards. The first three of these tables contain codes universally known as **I**nternationally recognized **N**umbers for the **I**dentification of **D**ata (INID) Codes. These Standards are, namely, WIPO Standard ST. 60 (Recommendation concerning bibliographic data relating to marks), Standard ST. 9 (Recommendation concerning bibliographic data on and relating to patents and supplementary protection certificates (SPCs)), Standard ST. 80 (Recommendation concerning bibliographic data relating to industrial designs) and Standard ST. 3 (Recommended standard on two-letter codes for the representation of states, other entities and intergovernmental organizations).

INID Codes For Marks

Code	Interpretation	Code	Interpretation	Code	Interpretation
(111)	Registration number	(511)	Symbol of the Nice Class	(740)	Representative's name
(151)	Date of registration	(540)	Description of the mark	(814)	Designated states
(210)	Application number	(580)	Date of recorded change	(869)	Accepted with reserve
(220)	Filing date	(731)	Applicant's name		

INID Codes For Patents

Code	Interpretation	Code	Interpretation	Code	Interpretation
(11)	Patent number	(54)	Title of the invention	(73)	Name(s) of holder(s) of patent or patentee's name. If in announcements concerning " <i>Patent Applications Assigned</i> " or " <i>Patents Assigned</i> ", this code represents the name of the assignor (or the name of the current owner of the patent application or the name of the current owner of the patent)
(21)	Application number	(56)	List of prior art documents cited in the examination	(74)	Attorney's name
(22)	Filing date	(57)	Abstract	(75)	Name(s) of inventor(s) who is/are also applicant(s)
(23)	Date when action is to be taken, if in announcements for " <i>Patent Applications Pending Grant</i> "; date from which status takes effect, if in " <i>Applications Abandoned</i> " or in " <i>Patents Abandoned</i> "	(71)	Applicant's name. If in announcements concerning " <i>Patent Applications Assigned</i> " or " <i>Patents Assigned</i> ", this code represents the name of the assignee (or the name of the new owner of the patent application or the name of the new owner of the patent)	(84)	States designated under the Harare Protocol
(24)	Effective date of patent	(72)	Name(s) of inventor(s)	(86)	Patent Cooperation Treaty (PCT) international filing date and number
(31)	Priority number			(96)	Harare Protocol filing date and number
(32)	Priority date				
(33)	Convention country / Convention organization				
(45)	Date of publication				
(51)	Symbol of the International Patent Classification (IPC)				

Data Identification Codes (Contd.)

INID Codes For Industrial Designs

Code	Interpretation	Code	Interpretation	Code	Interpretation
(11)	Design registration number	(40)	Publication date	(74)	Attorney's name
(21)	Design application number	(51)	Symbol of the Locarno Classification	(75)	Name(s) of creator(s) who is/are also applicant(s)
(22)	Filing date	(54)	Title of the design	(84)	States designated under the Harare Protocol
(24)	Effective date of registration of design	(55)	Symbol of the design		
(31)	Priority number	(71)	Applicant's name		
(32)	Priority date	(72)	Name of creator of the design		
(33)	Convention country / Convention organization	(73)	Name of holder of the design registration		

Country/Organization Codes Used in this Issue of the Journal

PHASE-STABILIZED AMMONIUM NITRATE EXPLOSIVES

(57) Abstract

Phase-stabilized ammonium nitrate (PSAN) explosives containing PSAN prills and a fuel are provided. The PSAN prills contain ammonium nitrate, a potassium salt, and an inorganic porosity enhancing agent.

(54) Title
UNDERGROUND WORKSITE VEHICLE POSITIONING CONTROL

(57) Abstract

According to an example aspect of the present invention, there is provided a method, comprising: defining accumulated dead-reckoning based positioning error of a vehicle at a worksite comprising an underground tunnel system, detecting a trigger for signal acquisition for satellite based first positioning source, in response to the detected trigger for signal acquisition, generating a satellite positioning pendency estimate indicative of remaining time period for obtaining satellite-based positioning information by the first positioning source, defining speed for the vehicle on the basis of the accumulated dead-reckoning based positioning error and the satellite positioning pendency estimate.

(54) Title
 UNDERGROUND VEHICLE MONITORING SYSTEM FIELD

(57) Abstract

According to an example aspect of the present invention, there is provided a method, comprising: obtaining route plan information, indicative of a set of route points for a tunnel system of an underground worksite for at least partially autonomous driving of a vehicle, further comprising performing for at least some of route points in the set: detecting space information indicative of spaces required by the vehicle at associated route points, generating a set of envelopes on the basis of the space information, wherein an envelope is indicative of space required by the vehicle at an associated route point, and controlling visualization of the set of envelopes in a tunnel model to represent planned route trace of the vehicle when driving via the route points.

(54) Title
 METHOD FOR MANUFACTURING AN INSERT FOR A PASSPORT BOOKLET DATA PAGE

(57) Abstract

The invention relates to a method for making a data page (10) for a passport booklet, which page is formed of a multilayer complex comprising a central core (2) made of plastic ending on one side with at least one metallic strip intended to form a hinge (5) where the data page (10) is intended to be stitched or stapled into a passport booklet, and outer layers (1, 3) made of plastic applied to each face of said core (2), this method comprising steps consisting in: superposing the central core (2) and the outer layers (1,3) and laminating them together by applying a predetermined lamination temperature and pressure; freeing the metal hinge (5) by weakening and removing an excess part (14) of each outer layer (1,3) situated in line with said at least one metallic strip (5); characterized in that, in order to remove said excess part, it comprises a step involving making a pre-cut (6) in each outer layer (1,3) so as to obtain a weakened zone (14) in each outer layer (1,3), followed by a step of removing said weakened zone (14) along said pre-cut (6).

(54) Title
APERIODIC CSI OVER MULTI-TRP PUSCH

(57) Abstract

Systems and methods for aperiodic Channel State Information (CSI) over multi-Transmission/Reception Point (TRP) Physical Uplink Shared Channel (PUSCH) are provided. In some embodiments, a method performed by a wireless device for providing feedback includes: repeating PUSCH over multiple $M > 1$ PUSCH occasions with P spatial relations and/or Uplink Transmission Configuration Indicator (TCI) states; and multiplexing Aperiodic CSI (A-CSI) with PUSCH on $N \geq 1$ PUSCH transmission occasions wherein N includes at least one PUSCH transmission occasion associated with each of the P spatial relations or UL TCI states. This may enable improved A-CSI reliability in multi-TRP scenarios. By repeating A-CSI (multiplexed with PUSCH or not multiplexed with PUSCH) over multiple TRPs, the reliability of A-CSI can be improved since the ACSI can be received by at least one TRP. This method is particularly beneficial in FR2 cases where the channel between a TRP and a UE can experience channel blocking.

DEVICE AND METHOD FOR DETERMINING AND USING A SURPLUS OF AVAILABLE ELECTRICAL POWER GENERATED BY A SOLAR PHOTOVOLTAIC GENERATOR

(57) Abstract

The invention relates to a device (S) for managing a surplus (P3) of photovoltaic power available at the terminals of a photovoltaic generator (DE) provided with photovoltaic panels (PV) that are capable of supplying power to fixed-power electrical appliances (AF) and variable-power electrical appliances (AV) connected to said photovoltaic generator (DE), said surplus of power (P3) being equal to the difference at each time t between the maximum potential electrical power (P1) that said photovoltaic generator (DE) could produce taking into account its illumination, and the electrical power (P2) actually consumed at each time t by said electrical appliances (AF, AV), wherein said device (S) includes: - a photoelectric control sensor (PE) that is able to measure at each time t the solar light intensity received by said photovoltaic panels (PV) and to deduce therefrom said maximum potential electrical power (P1); - a means (MP3) for determining said surplus of available power (P3), compared at this time t, between the value of the maximum potential electrical power (P1) and the value of the electrical power (P2) actually consumed by said electrical appliances (AF; AV); - and a means (MPG) for managing said surplus of available power (P3), said means (MPG) being configured to redirect and distribute said surplus of available power (P3) between said electrical appliances (AF, AV).

 WIRELESS FLOW CONTROL DEVICES AND METHODS TO REESTABLISH FLUID FLOW THROUGH A FLOW CONTROL DEVICE

(57) Abstract
 A wireless flow control device includes a shiftable apparatus and a power source configured to provide power to shift the shiftable apparatus from a first position to a second position. The wireless flow control device also includes a valve that forms a first fluid flow path through the wireless flow control device while the shiftable apparatus is in the first position. The wireless flow control device further includes an actuation assembly, which, when actuated, forms a second fluid flow path through the wireless flow control device, and a turbine configured to recharge the power source.

(54) Title
DICARBOXYLIC ACID ESTERS FOR INDUCING AN ANALGESIC EFFECT

(57) Abstract

The disclosure provides compositions and methods of inducing an analgesic effect. In particular, the methods include administering to a subject in need a pharmaceutical composition comprising a dicarboxylic acid ester.

(54) Title
VERSATILE SYSTEM EQUIPPED WITH A PAIR OF MECHANISMS WITH
ECCENTRIC ELEMENTS CAPABLE OF MOVING IN ROTATION

(57) Abstract

The invention relates to a system comprising in particular two mechanisms (100, 200) each comprising a first support shaft (120, 220) equipped with a toothed wheel (121, 221) and with an element (122, 222) that is eccentric relative to the axis (A120, A220) of rotation of the support shaft (120, 220), and a second support shaft (130, 230) equipped with a toothed wheel (131, 231) and with an element (132, 232) that is eccentric relative to the axis (A130, A230) of rotation of the support shaft (130, 230). According to the invention, the eccentric elements (122, 132, 222, 232) of at least one mechanism (100, 200) are disposed at least partially in a plane of rotation (PR, PR') perpendicular to the associated support shafts (120, 130, 220, 230) and, when the system (1) is in operation, positions of the eccentric elements (122, 132) of one mechanism (100) are constantly diametrically opposed to positions of the eccentric elements (222, 232) of the other mechanism (200).

HIGH LENGTH ISOTOPES SEPARATION COLUMN AND METHOD FOR ASSEMBLY

(57) Abstract

The present invention relates to the field of distillation of isotopes obtained by distillation columns. An object of the present invention is to describe an innovative distillation column which provides significant improvements to the prior art. In particular, the distillation column will be a modular innovatively conceived column having any needed height.

(54) Title
UNDERGROUND WORKSITE VEHICLE POSITIONING CONTROL

(57) Abstract

According to an example aspect of the present invention, there is provided a method, comprising: defining first confidence level information for position information by a satellite based first positioning source of a vehicle at a worksite comprising an underground tunnel system, defining second confidence level information for position information by a second positioning source configured to position the vehicle based on environment scanning, selecting a positioning correction source for the vehicle on the basis of the first confidence level information and the second confidence level information, and applying the selected positioning correction source for correcting dead-reckoning based positioning for the vehicle.

(54) Title
TREATMENT PLANNING FOR ALPHA PARTICLE RADIOTHERAPY

(57) Abstract

Apparatus (100) for planning a diffusing alpha-emitter radiation therapy (DaRT) treatment session. The apparatus includes an output interface (110) and a memory (112) configured with a plurality of tables which provide an accumulated measure of radiation over a specific time period, due to one or more types of DaRT radiotherapy sources which emit daughter radionuclides from the source, for a plurality of different distances and angles relative to the DaRT radiotherapy source. In addition, a processor (108) is configured to receive a description of a layout of a plurality of DaRT radiotherapy sources in a tumor, to calculate a radiation dose distribution in the tumor responsive to the layout, using the tables in the memory, and to output feedback for the treatment responsive to the radiation dose distribution, through the output interface.

(54) Title
METHOD FOR MANUFACTURING STEEL PIPE SHEET PILE HAVING MECHANICAL JOINT PIPE

(57) Abstract

Provided is a method for manufacturing a steel pipe sheet pile including a steel pipe main body, a mechanical joint pipe provided at an end of steel pipe main body, and a joint pipe provided on outer peripheral surfaces of the steel pipe main body and the mechanical joint pipe, in ensuring the circularity of the mechanical joint pipe. The method for manufacturing a steel pipe sheet pile including a mechanical joint pipe according to the invention includes: a first pipe attachment step S1 of attaching a first pipe 15 to the outer peripheral surface of the steel pipe main body 3 away from an end of the steel pipe main body 3 by 200 mm or more; a first slit formation step S3 of forming, after the first pipe attachment step S1, a first slit 15a on the first pipe 15; a mechanical joint pipe attachment step S5 of attaching, after the first slit formation step S3, the mechanical joint pipe 5; a second pipe attachment step S7 of fixing, after the mechanical joint pipe attachment step S5, a second pipe 17 which is provided with a second slit 17a to the outer peripheral surface of the steel pipe main body 3, and welding the end portion of the first pipe 15 and the closer end portion of the second pipe 17; and a slit communicating step S9 of communicating, after the second pipe attachment step S7, the first slit 15a and the second slit 17a.

WEAR ASSEMBLY

(57) Abstract

A wear assembly for earth working equipment including a wear member including an exterior surface, an opening to receive a separable component, and a hole extending from the external surface to the opening. A lock in the hole to secure the separable component to the wear member, wherein the lock includes a collar and a pin that is adjustable within the collar so that the pin is movable inward to retain the separable component and movable outward to release the separable component. A magnet to secure the collar in the hole. The lock may pivot outwardly into the hole.

(54) Title

INTEGRATION OF HIGH FREQUENCY RECONSTRUCTION TECHNIQUES WITH REDUCED POST-PROCESSING DELAY

(57) Abstract

A method for decoding an encoded audio bitstream is disclosed. The method includes receiving the encoded audio bitstream and decoding the audio data to generate a decoded lowband audio signal. The method further includes extracting high frequency reconstruction metadata and filtering the decoded lowband audio signal with an analysis filterbank to generate a filtered lowband audio signal. The method also includes extracting a flag indicating whether either spectral translation or harmonic transposition is to be performed on the audio data and regenerating a highband portion of the audio signal using the filtered lowband audio signal and the high frequency reconstruction metadata in accordance with the flag. The high frequency regeneration is performed as a post-processing operation with a delay of 3010 samples per audio channel.

HORIZONTAL FILTRATION EQUIPMENT AND ASSOCIATED DISCHARGE ARRANGEMENT/METHOD

(57) Abstract

The disclosure relates to a discharge arrangement (10) for horizontal filtration equipment (1). The discharge arrangement (10) comprises a conveyor (11) configured to be provided below the horizontal filtration equipment (1) for receiving discharge material discharged from the horizontal filtration equipment, and a drive (15) for driving the conveyor (11). The drive (15) is configured to enable driving the conveyor (11) in two opposite directions. Thereby, material provided on the conveyor (11) can be discharged at either a first end (13) or a second end (14) depending on the direction in which the conveyor is driven.

(54) Title

SYSTEM AND METHOD FOR AUTHENTICATION AND ASSOCIATION OF MULTI-PLATFORM ACCOUNTS

(57) Abstract

The present invention concerns the verification and authentication of independent digital wallets and, particularly, the linking of regulated and unregulated digital wallets on a public blockchain. An unregulated trading system has a public certificate module arranged selectively to write NFTs into specific unregulated accounts. A public ledger database of the blockchain system stores unregulated accounts which each contain: (i) a document type identifier having a related minted unique non-transferable NFT linked to an externally generated certificate hash and where each non-transferable NFT is obtained via writing of a smart contract and each non-transferable NFT is a permanent record for a description of the document type; and (ii) a link to a private wallet of a regulated account of a regulated trading platform. The link relates directly to the minted nontransferable NFT issued from the certificate module. Each non-transferable NFT is configured to be changed or moved from the unregulated wallet only through an interaction that directly involves the certificate module.

SOFTWARE-BASED, SPEECH-OPERATED AND OBJECTIVE DIAGNOSTIC TOOL FOR USE IN DIAGNOSING A CHRONIC NEUROLOGICAL DISORDER

(57) Abstract

The invention relates to a software-based diagnostic tool, a method for operating same, and a diagnostic system for use in diagnosing a chronic neurological disorder such as autism in both children and adults. The diagnostic tool comprises a speech analysis module (21) for identifying characteristic values (28) of a vocal biomarker in a speech signal (26) of a subject (11), at least one further module (22, 23) for identifying characteristic values (30, 32) of a second biomarker, and an evaluation unit (25) connected downstream thereof. The speech analysis module (21) comprises: a speech-signal-triggering controller (21a) which displays image data on an image display device (7) in order to trigger at least one speech signal (26) in the subject (11); a speech recording unit (21b) which records the speech signal (26); and a speech signal analyzer (21c) which subsequently evaluates the speech signal (26) to determine first at what point in time which pitch level is present, and subsequently determines a frequency distribution of the pitch levels among a number of frequency bands of a selected frequency spectrum, with this frequency distribution forming the characteristic values (28) of the vocal biomarker. On the basis of the characteristic values (28, 30, 32) of the biomarkers, the evaluation unit (25) determines, by applying a machine learning algorithm and comparison with a multi-dimensional interface, whether the subject (11) has the chronic neurological disorder.

The diagram illustrates a diagnostic system (1) for use in diagnosing a chronic neurological disorder. A subject (11) is shown interacting with the system. The system includes a triggering controller (21a) which displays image data on an image display device (7) to trigger a speech signal (26) from the subject. A speech recording unit (21b) records the speech signal (26). A speech signal analyzer (21c) evaluates the speech signal (26) to determine characteristic values (28) of a vocal biomarker. The system also includes modules (22, 23) for identifying characteristic values (30, 32) of a second biomarker, and an evaluation unit (25) which determines, based on the characteristic values (28, 30, 32), whether the subject (11) has the chronic neurological disorder. The evaluation unit (25) applies a machine learning algorithm and comparison with a multi-dimensional interface.

(54) Title
IMAGE CODING DEVICE, IMAGE CODING METHOD AND IMAGE CODING PROGRAM, AND IMAGE DECODING DEVICE, IMAGE DECODING METHOD AND IMAGE DECODING PROGRAM

(57) Abstract

Provided is a picture encoding device that divides a picture into blocks and performs encoding for each of the divided blocks. A primary signal block divider (101) divides a primary signal of the picture into rectangles having a predetermined size, and generates a primary signal block. A secondary signal block divider (101) divides a secondary signal of the picture into rectangles having a predetermined size, and generates a secondary signal block. A primary signal predictor (102) predicts a primary signal, and a secondary signal predictor (102) predicts a secondary signal. The secondary signal predictor (102) can perform inter prediction of predicting a secondary signal from an encoded primary signal, and the inter prediction is restricted based on at least one of a size of the primary signal block and a size of the secondary signal block.

(54) Title
ACCURATE CENTERING SYSTEM AND CONTROL SYSTEM FOR PROCESSING GYPSUM-BASED BUILDING MATERIALS

(57) Abstract

The present invention discloses an accurate centering system and a control system for processing a gypsum-based building materials, which comprises a gypsum board conveying device and a sticking film unwinding device, wherein centering driving mechanisms are installed on both sides of the gypsum board conveying device, and horizontally arranged T-shaped push rods are installed on both sides of the centering driving mechanisms; and the sticking film unwinding device comprises a driven rotating shaft, a sticking film winding film winding roller and an annular clamping piece which are axially and slidably installed on the rotating shaft and coaxially arranged with the rotating shaft, and a centering linkage component for linking the annular clamping piece with the T-shaped push rod. Through the two centering linkage components, two T-shaped push rods and two annular clamping pieces are connected and linked when fixing the film roll, so that the situation that the gypsum board to be coated cannot be aligned with the film on the corresponding film roller is prevented, the material loss caused by coating failure is avoided, and the situation that the growth line is stopped and transformed into the overall production efficiency is reduced due to the position deviation of the film roller and gypsum board during coating is avoided.

(54) Title
SECURITY FOR TRAFFIC RELAYING BY A WIRELESS COMMUNICATION DEVICE

(57) Abstract

A method performed by an authentication server is provided. The method comprises receiving a request for authentication of a remote wireless communication device, wherein the request requests reuse of a proximity services relay user key for deriving a shared key for protecting an interface between the remote wireless communication device and a relay wireless communication device, wherein the relay wireless communication device is configured to relay traffic for the remote wireless communication device.

(54) Title
FULL DUPLEX WIRELESS COMMUNICATION SYSTEM WITH SINGLE MASTER CLOCK

(57) Abstract

A base station and the customer premises equipment (CPE) transceivers are configured to use a single master clock for all frequency conversions. The modem of each CPE has a clock output and that output is connected to the upconverter in the transceiver uplink or to both the upconverter and the downconverter as required.

(54) Title
A BOWL FOR A BATCH CENTRIFUGAL CONCENTRATOR

(57) Abstract

The present invention is a segmented bowl for a batch centrifugal concentrator constructed from a plurality of segments that are each placed adjacently to one another, so that each segment is in intimate contact with its neighbouring segments, so that when a sufficient number of segments are put into place, they form the bowl of the batch centrifugal concentrator.

LAYERED CODING FOR COMPRESSED SOUND OR SOUND FIELD REPRESENTATIONS																					

Patents Granted (Contd.)

(57) Abstract

The present document relates to a method of layered encoding of a compressed sound representation of a sound or sound field. The compressed sound representation comprises a basic compressed sound representation comprising a plurality of components, basic side information for decoding the basic compressed sound representation to a basic reconstructed sound representation of the sound or sound field, and enhancement side information including parameters for improving the basic reconstructed sound representation. The method comprises sub-dividing the plurality of components into a plurality of groups of components and assigning each of the plurality of groups to a respective one of a plurality of hierarchical layers, the number of groups corresponding to the number of layers, and the plurality of layers including a base layer and one or more hierarchical enhancement layers, adding the basic side information to the base layer, and determining a plurality of portions of enhancement side information from the enhancement side information and assigning each of the plurality of portions of enhancement side information to a respective one of the plurality of layers, wherein each portion of enhancement side information includes parameters for improving a reconstructed sound representation obtainable from data included in the respective layer and any layers lower than the respective layer. The document further relates to a method of decoding a compressed sound representation of a sound or sound field, wherein the compressed sound representation is encoded in a plurality of hierarchical layers that include a base layer and one or more hierarchical enhancement layers, as well as to an encoder and a decoder for layered coding of a compressed sound representation.

(54) Title
BORE HOLE SUPPORT

(57) Abstract

The invention provides an apparatus and method for preventing surrounding loose rock fragments from falling or collapsing into a bore hole during drilling and immediately after removal of a drill string from the bore hole. The apparatus includes bore hole sleeve for a bore hole drill, the sleeve including a tube member adapted to be coupled to a mast of a mobile bore hole drill and to be positioned within the collar region of a bore hole, the tube member including a longitudinal internal passage for receiving a drill string therethrough and an external surface for facing outwardly against a wall of the bore hole.
